...to provide quality engineered solutions

## Pallet Mag / Demag

### Product

Designed alongside one of the worlds leading Retail Security firms, the Pallet Activator/Deactivator is designed for large scale Magnetising/Demagnetising of EAS labels attached to products within pallet containers eliminating the need for individual location.

The product provides a solution for larger scale on site warehousing or distribution centres to activate and deactivate security labels within a conveyor belt or offline (manual) system.

### Features

- Continuous feed rate of 1 pallet per two minutes for both activation and deactivation
- Power pack is provided with various mounting and interconnects options
- Safety features meet all worldwide regulations
- Customisation options are limitless. The unit is designed with full tailoring options available to customer specifications.

### Technical Specifications

- Pallet Dimensions: 127 x 147.3 x 218.5cm (DWH)
- Power/Control Unit Dimensions: 1.2 x 0.6 x 1.8m (WDH)
- Input Power Source:  
230V +6/ - 10% single phase 50Hz for EU operation  
115V  $\pm$  10% single phase 60Hz for North American operation
